Health & Safety Policy

The health, safety, and wellbeing of our people are fundamental to everything we do, guided by Mace's 'Safety First' value. Our unwavering commitment ensures that our employees and supply chain partners return home safe and well every day.

As we strive to redefine ambition within our industry, we continuously build on our culture of health, safety, and wellbeing. This progress is driven by visible leadership, innovation, and the collective dedication of our team, partners, and clients. The cornerstone of embedding this culture lies in five key elements that are vital to achieving 'Safety First': Standards, Leadership, Engagement, Behaviour, and Work Environment. The continuous evolution of these elements is critical to our success, allowing us to identify, prevent, and manage occupational health risks effectively. By working closely with clients and supply chain partners, we demonstrate global leadership in creating and maintaining healthy workplaces, from our offices and construction sites to those of our clients.

Our commitment extends to supporting the overall wellbeing of our people. By developing a comprehensive understanding of their needs, we remain dedicated to discovering new, innovative ways to offer support. Utilizing a data-driven approach, we enhance our risk management, reporting, training, and activity oversight, continually seeking opportunities for improvement and fostering a culture of learning and growth.

Focusing on our people, our operations, and innovation, we solidify our role as an industry leader. Yet, we recognize there is always room for improvement. By challenging mindsets, questioning the status quo, and sharing knowledge, we keep health, safety, and wellbeing at the forefront of our agenda.
